Advanced massage with modern design that gently loosens muscles.

New mechanism provides a gentle massage with wide rubbing movements.

The float mechanism gently touches the body. While moving along the spinal line, it provides a gentle, comfortable kneading.

Maximum oscillating range of approx. 40° Fits gently and floats along your body.

The massage head drive switching gear mechanism provides gentle "Hawaiian" movements over a wide area.

Hawaiian operation Knead operation

Right, left, top and bottom massage heads are all changed to the same tilt.

The direction of massage heads becomes the same, providing a gentle-touch massage.

The left and right massage heads are angled to provide a firm massage.

A total of 44 types of techniques including Hawaiian massage, etc. are provided by the new thumb-sensation massage heads.

The special characteristic of a Hawaiian massage is to loosen in a healing way by using the arms or palms of hands.

Provides the sensation of a wide-area massage using the palms of hands or the entire arm.

Loosen gently as if moving palms to draw circles. Soft compression as if pressing toward the outside.

Gentle gradual pressing with the sensation of thumbs. Thorough loosening with the sensation of kneading upward.

3 pre-programmed operations to comfortably loosen your body.

Recommended for those with severe stiffness or who prefer a stimulating massage.

Uses mainly Soft Shiatsu, Tap and Knead actions to comfortably loosen and provide relief from tension held at pressure points.

Recommended for those who are just starting out or prefer a gentle massage

Uses mainly Swedish, Hawaiian and Knead actions to evenly apply muscle relaxing strokes all over.

Recommended for those who are tired and stiff from working with bad posture doing office work and house work.

Uses Full Roll, Compression and Leg Stretch to stretch all your muscles. A kneading action is applied to a stiff back and joints to refresh the posture and strengthen you against fatigue.

"3-way foot massager" that massages the legs and eliminates fatigue.

Normally used as a foot rest. Use the lever to massage your calves or plantar regions with air.

The side and back of your calves are enclosed, squeezed, and comfortably massaged.

The sides of feet are fixed and key points of your plantar regions are massaged by the finger-pressure treatment seat.

Just press the selected button.
